SUMMARY

Backend & AI Engineer with hands-on experience building production-grade systems — high-throughput API gateways handling 6,000+ RPS, autonomous LLM-powered CLI agents with multi-provider support, and ML-backed web applications with measurable performance outcomes. Proficient in Node.js, TypeScript, Python, system design, and applied AI/ML. Seeking backend or AI engineering internships to ship reliable, impactful production features.

EDUCATION

Mumbai University — B.E. Artificial Intelligence & Machine Learning

Expected Apr 2028

Universal College of Engineering, Mumbai | Discipline & Anti-Ragging Committee Head

EXPERIENCE

Backend Engineer Intern — SR India

Jan 2026 – Feb 2026 · Remote

- Engineered REST APIs for a hotel booking platform (Node.js, Express, PostgreSQL) covering 4 core modules — bookings, room availability, user management, and admin controls — with JWT auth and RBAC.
- Improved API performance and reliability through targeted query optimization, input validation, and Redis caching; eliminated redundant DB calls across high-frequency booking endpoints.
- Integrated all endpoints into a React dashboard and maintained Postman collections documenting request/response contracts, enabling zero back-and-forth handoffs with the frontend team.

PROJECTS

resolv — AI-Powered GitHub Issue Resolver CLI

[GitHub](#)

TypeScript · Node.js · LLM APIs · RAG Pipelines · ts-morph

- Autonomous CLI agent that fetches GitHub issues, fingerprints repo coding patterns via RAG (ts-morph DNA extraction + NIM embeddings), and generates style-matched patches via an LLM tool-calling loop in under 60 seconds.
- Unified 7 LLM providers (Anthropic, OpenAI, Gemini, Grok, OpenRouter, NVIDIA NIM, Ollama) behind a single OpenAI-compatible interface — switching providers requires one config change.
- Shipped web search (Brave + DuckDuckGo fallback), codebase grep/write tools, persistent chat sessions (/resume, /sessions, /history), and repo-context compression cutting LLM token usage by ~70%.

API Gateway — High-Performance Reverse Proxy

[GitHub](#)

Node.js · Fastify · TypeScript · Redis · PostgreSQL · Prometheus

- Architected a production-grade API gateway from scratch reaching ~6,000 RPS at 250 concurrent users, outperforming naive Express proxies by 4x; load-tested with autocannon.
- Implemented Redis sliding-window rate limiting, circuit breaking (opossum), response caching, JWT/RBAC, Prometheus metrics, and Drizzle ORM migrations — reduced downstream service load by ~40% under burst traffic.

Pixel — AI Image Authenticity Analyzer

[GitHub](#)

PyTorch · ResNet18 · Node.js · React · Supabase

- Fine-tuned ResNet18 on 1,000+ images to classify real vs. AI-generated content, achieving 88% validation accuracy — exceeding the 80% project benchmark.
- Developed a multi-signal scoring pipeline (model confidence + EXIF metadata + perceptual hash) producing a 0–100 authenticity score; full-stack deployment with end-to-end inference under 1.2 seconds.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, C++
Backend:	Node.js, Fastify, Express.js, REST APIs, System Design, Authentication, Authorization, RBAC
AI / ML:	PyTorch, NumPy, Pandas, Scikit-learn, LangChain, RAG Pipelines, LLM Tool-calling, Prompt Engineering
Databases:	PostgreSQL, MongoDB, Redis, Drizzle ORM, Database Design
DevOps:	Linux, Git, GitHub Actions, Prometheus, Docker, AWS, Postman
Frontend:	React, Next.js, HTML, CSS, MERN Stack

CERTIFICATIONS

- Complete Data Science, Machine Learning, DL & NLP Bootcamp — Udemy
- Node.js, Express, MongoDB & More: The Complete Bootcamp — Udemy [Certificate](#)
- The Ultimate React Course 2025: React, Next.js, Redux & More — Udemy [Certificate](#)
